Call for Industrial Engineering Data Science
2026 MEng Project Proposals

Stellenbosch
UNIVERSITY
IYUNIVESITHI
UNIVERSITEIT

In the MEng (Structured) programme with focus on Data Science, which is hosted by the Department of Industrial Engineering at Stellenbosch University, our students are required to complete a final data science research project. For these projects, we are looking for industry partners who are willing to propose a topic, to provide the necessary data (if not publicly available) and to act as domain mentors.

If you are interested in partnering with us for such a project to be completed in 2026 and giving a student the chance to work with real-world data, kindly complete this **form.** You may contact **DS-PROJECTS@sun.ac.za** for more information or attend information sessions on 5 and 12 September 2025 at 10:00–10:30am via **MS Teams**. Project proposals are due on 19 September 2025.

The Process:
Register project proposal, provide data, and domain knowledge

The Goal:
Use Data Science knowledge and skills to tackle existing industry challenges

Partner with us as we impact society through meaningful data science

The Benefits:
Business insights informed by data and skills development
